SUMMARY

Computer Science undergraduate with hands-on experience in full-stack development, machine learning, and competitive programming. Interned at Tarento Technologies building React and Node.js applications. Achieved a LeetCode contest rating of 1700+. Skilled in building end-to-end web applications and ML-based systems with a focus on clean, scalable solutions.

EDUCATION

B.Tech, Computer Science and Engineering *2023 – 2027*
CMR Technical Campus, Hyderabad 8.9 CGPA

SKILLS

Technical Skills	**:** Java, Python
Web Technologies	**:** HTML, CSS, JavaScript, ReactJs, NodeJs
Frameworks & Tools	**:** Git, GitHub, Postman
AI / ML	**:** Scikit-learn, Pandas, Random Forest , TF-IDF
AI Tools	**:** ChatGPT, Claude, Cursor, Lovable, GitHub Copilot, Codex
Core	**:** Data Structures and Algorithms , Object-Oriented Programming, SQL(MySql / Mongodb)

EXPERIENCE

Tarento Technologies – Software Development Intern (Feb 2026 – March 2026)

- Built and tested React.js UI components and integrated them with Node.js REST APIs
- Tested and validated backend API endpoints using Postman, identifying and reporting response issues
- Collaborated on database and backend tasks in a real-world development environment

PROJECTS

AI Finance Controller | React · Supabase · Razorpay · Gemini API | github link | live link

- Built a multi-organization finance dashboard with Supabase (Postgres, Auth, Row Level Security, Edge Functions) for org-scoped transaction data and role-based Admin/Employee access.
- Implemented transaction CRUD, CSV import/export, automatic categorization, anomaly detection, and an employee expense-request approval workflow.
- Integrated Razorpay for INR payments, refunds, and webhook-driven status updates, and the Google Gemini API to answer natural-language questions about a user's financial data.

MERN Blog Platform | React · Node.js · Express · MongoDB · Redux Toolkit| github link | live link

- Built a full-stack blog platform with JWT authentication, CRUD operations, draft/publish workflow, comments, likes, and view tracking.
- Implemented user profiles with stats dashboard (total views, likes, published/draft count) and paginated blog feed.
- Used Redux Toolkit for state management; deployed frontend on Vercel and backend on Render with MongoDB Atlas.

CyberGuard: AI-Powered Content Moderation Platform | github link | live link

- Built a full-stack moderation platform using React, Django REST Framework, and JWT authentication to detect toxic and spam content.
- Integrated ML-based text classification (scikit-learn) with YouTube comment analysis to generate toxicity scores and surface harmful content.
- Developed an admin dashboard with flagged content review, user management, appeal decisions, and moderation analytics
  Tech Stack: React, Vite, Django REST Framework, PostgreSQL, JWT, scikit-learn, YouTube Data API, Render

UNIVERSITY ROLES PROGRAMS

Executive Member – Intel Club (Tech Club)
Organized and participated in technical events, workshops, and coding challenges to engage peers in emerging technologies.

CERTIFICATIONS

- Smart Coder Certification (DSA) – Smart Interviews
- Salesforce Platform Developer Certification – Salesforce
- Infosys Spring Boot Certification – Infosys

ACHIEVEMENTS

- **Semi Finalist**, Smart India Hackathon (Top 15 of 100+ teams)
- **365 Days LeetCode Badge** – Consistently solved DSA problems for 365 + days, 1700+ rating in competitive programming
- **Diamond Badge CodeChef** – Earned for consistent problem-solving & competitive programming performance
